UNIVERSITY STUDENTS & SOCIAL MEDIA USAGE

5 BLIND MICE

HANSEONG_KANG_INTERVIEW_2

1. Has social media ever gotten in the way of your sleep, uni work, or other parts of your daily life? What did that look like?

Yea I guess so. I always go on tiktok before I sleep don't know why... its basically a routine atp.

2. How does your relationship with social media influence your relationship with physical activity?

Depends. If I feel motivated I can multitask like going on the treadmill and watching lectures at the same time. Good use of my time. But other times I just lie down on my bed and doomscroll.

3. Has social media ever shaped how you spent time with friends or family, whether positively or negatively? What happened?

Yea sometimes. Some people are just too addicted to their phones so much that they go on social media waiting for out food in restaurants instead of actually socialising each other. But for me... I don't do that

4. Have you ever tried to cut back on social media or set boundaries around it? Walk me through what you tried and how it went.

Yea, I had to turn off notifications for my social medias since its soo distracting when I see a “friend sent you a reel”. But in case someone really needs me bad... I just have notifications on in case someone needs me bad. I kinda wish theres an algorithm that detects if the message is urgent or not so all the reels I don’t get a notification.

5. Have you ever hit a screen time limit or been locked out of an app? What did you do? If that hasn't happened, what do you think you would actually do if your phone cut you off?

I don’t really use screentime but if that happened to me... ill probably just use another app or device tbh.

6. The last time you opened social media, what were you doing beforehand? What motivates you to reach for it?

cant remember. My brain just tells me to go on insta or tiktok.

7. Walk me through a recent time where you sat down to quickly check social media and ended up staying much longer. What kept you there?

Probably all the videos on Instagram, tiktok etc. ill watch like part 1 of a movie clip on tiktok then I spent like 1 hour watching the entire series. Or I see like a really fun youtube video and just waste 2 hours on it.

8. Think of the last time you came away from social media feeling good, and the last time you came away feeling worse. What was different about each?

Feeling good I guess... having a laugh from the reel your friend sent? Feeling worse is when you spent 3 hours on phone and its 2am and need to sleep.
