UNIVERSITY STUDENTS & SOCIAL MEDIA USAGE

5 BLIND MICE

HANSEONG_KANG_INTERVIEW_1

1. Has social media ever gotten in the way of your sleep, uni work, or other parts of your daily life? What did that look like?

Mostly, for some reason I like to check my phone before I go to sleep... and before you know it 2 hours has passed you're your sleeping schedule is messed up. Other than that, sometimes ill study and just go on my phone like its muscle memory so its kind of distracting.

2. How does your relationship with social media influence your relationship with physical activity?

Honestly, I don't really work out since uni itself keeps me busy but during the holidays when I work out a lot I literary go on my phone between my gym sets. Its so distracting and I just waste a lot of time.

3. Has social media ever shaped how you spent time with friends or family, whether positively or negatively? What happened?

Yes and no... there are pros and cons to social media such as you can share memories with family and friends, communicate with them but I guess that also means its addictive... especially when someone sends me like 10 brain rot reels to me.

4. Have you ever tried to cut back on social media or set boundaries around it? Walk me through what you tried and how it went.

Yes but it never goes well. I try to put a screen time on my phone but when I use all my daily screen time, I can just override it so there is no point for me. I also turn on do not disturb time to time but that doesn't really help with my distraction.

5. Have you ever hit a screen time limit or been locked out of an app? What did you do? If that hasn't happened, what do you think you would actually do if your phone cut you off?

Yea like before I can just override it. Like I don't have any parental control as I am like 20 years old. Also I have mixed opinions on this, sometimes in urgent emergencies you have to override the screen time function but if you cant override it and its urgent... then its going to be a bad day.

6. The last time you opened social media, what were you doing beforehand? What motivates you to reach for it?

Studying... when I feel like its break time or just cant be bothered, that's when I open it.

7. Walk me through a recent time where you sat down to quickly check social media and ended up staying much longer. What kept you there?

THE REELS, so addicting... the brain rot too like its actually making me go crazzzy.

8. Think of the last time you came away from social media feeling good, and the last time you came away feeling worse. What was different about each?

Tbh I don't think I ever feel good using social media... everytime I use social media I just feel like "5 more minutes".
